USB Cable Length	170mm / 6.69"
Dimensions	106 x 50 x 35mm / 4.17" x
Weight	80g / 2.82oz

Getting Started

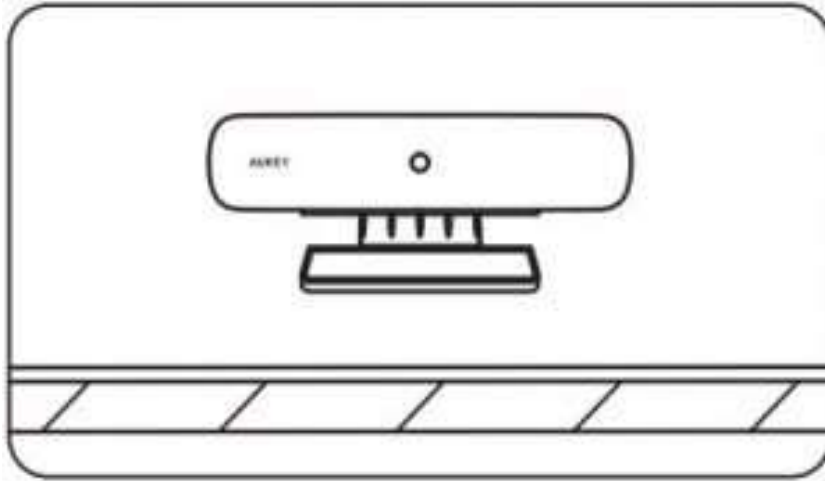

Positioning the Webcam

On a flat-screen computer monitor or laptop screen: Rest the rubber-padded bottom of the webcam on the top edge of the screen. The rubber pad of the clip/stand should be touching the back of the screen. The camera can be tilted up or down (ensure that both rubber pads are still in contact for a secure

fit).

On a desk or other flat surface: The plain plastic side of the attached clip/stand should be on the surface (below the camera). Angle the two clip/stand hinges for the most stable position, with the webcam tilted up or down for the best view.

Connecting the Webcam

1. Connect the webcam USB cable to your computer USB port (the camera will then appear in the 'Devices and Printers' section of the 'Control Panel'). The LED status indicator will light up red.
2. Open the video chat or recording software you want to use and begin a video call or video recording. While the camera is active, the LED status indicator will be purple.
3. Adjust the clip/stand or pivot the camera to fine-tune the angle and view.

Product Care & Use

- Ensure camera and mount are firmly fixed in place or stable before use to avoid falls
- Keep away from liquids, extreme heat, and strong magnetic fields
- Avoid touching the lens surface. It may be cleaned with a cotton swab or lens cleaning cloth. If any dirt is difficult to remove, a non-abrasive glasses lens cleaner may be used. Don't use corrosive solutions
